Experience/Projects

Development Intern – Hyland Software   May 2018 – Present

Assisted and managed the implementation of multiple components in a large application.

- Worked on a small team with an additional intern to develop a pop up viewer component. Application was built in Angular.

- Project planning was done using Agile methods with some components from SCRUM.

Development Research Assistant – Ohio State University   Sept. 2017 – May 2018

Assisted with various facets of a research project at OSU involving application development.

- Worked on a small team of other interns identifying errors in the application as well as possible fixes.

- Tasked with learning various different languages and software components.

Technology Consultant – Cloud Cover LLC   May 2016 – August 2017

Provide clients with tech support ranging from email issues to application issues. Fielded calls on a call by call basis as well as through a ticket system.

- Created and populated the documentation database for quick fixes for many different clients.

- Project planning with various types of customers to get various tasks done. (Surveillance installs, computer refreshing, server rests, etc.)
